

NEWSLETTER

of the WISCONSIN ENTOMOLOGICAL SOCIETY

Volume 23, Number 1

Les Ferge, Editor

April 1996

1995 ANNUAL MEETING NOTES

Appearing on pages two and three are the winning entries in the Annual Photo Salon held at last November's meeting. Many excellent slides were presented, contributing to a most interesting and colorful program. First place went to Mark Evans for his striking photo of *Cecropia* moths *in copula*. Second place went to the Hummingbird Moth (*Hemaris* sp.) by Robbye Johnson. Janice Stiefel took third and fourth place with *Arcigera* Flower Moth (*Schinia arcigera*) and Painted Lady butterfly. Fifth place went to Dave Westover for the Lance-tailed Darner (*Aeshna constricta*).

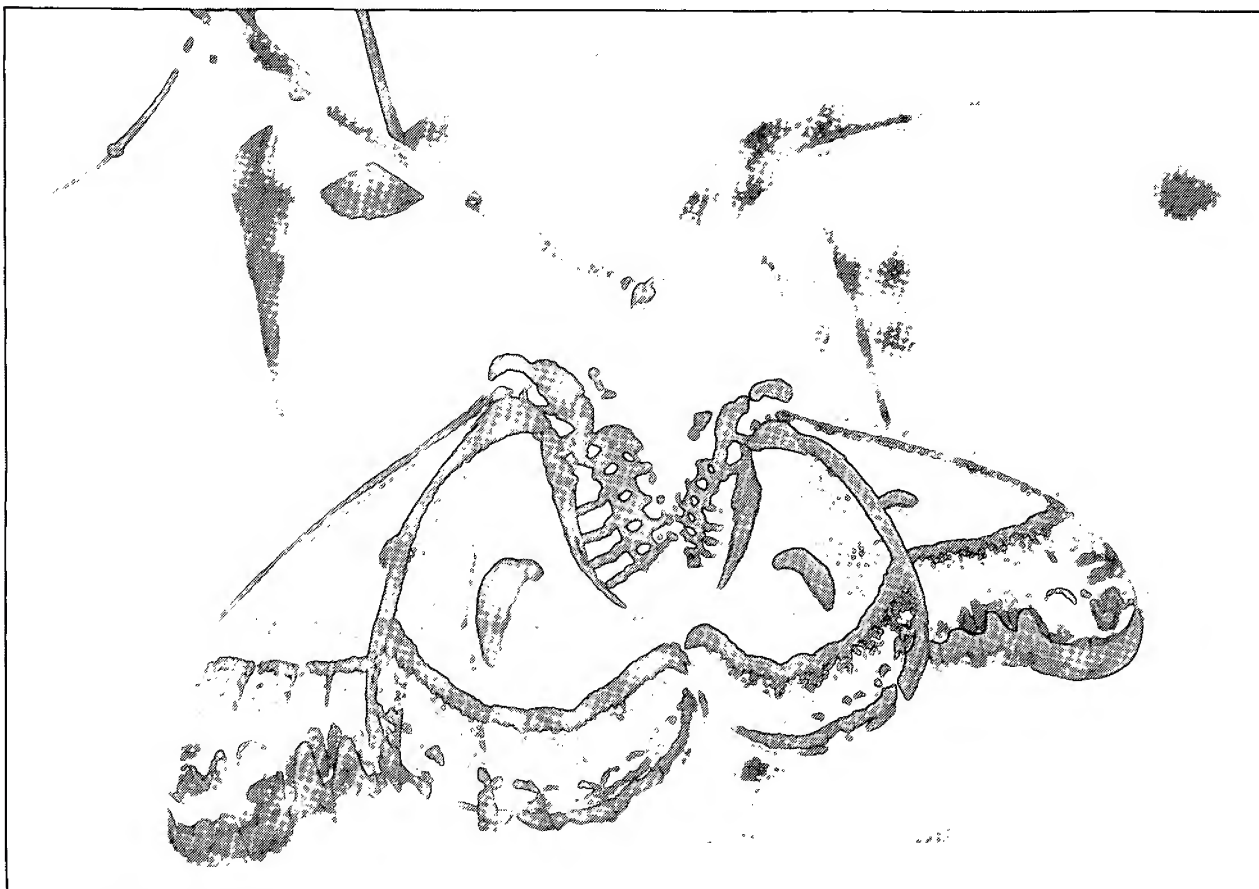

In addition, Cathy Bleser of the DNR's Bureau of Endangered Resources provided an update concerning State Natural Area collecting permits. The main topic of discussion was a proposed revision of permit rules to require disposition of voucher specimens in a suitable public facility (museum or university collection) within Wisconsin. Several members provided opinions and input that will be considered by the Natural Areas Preservation Council when it formalizes these changes.

Election of officers also took place. Since there were no new nominations or volunteers, last year's officers were voted in for another term. The officers for 1996 are: President, Phil Pellitteri; Vice-President, Gene Drecktrah; Secretary, Carol Ferge; and Treasurer, Tom Rocheleau.

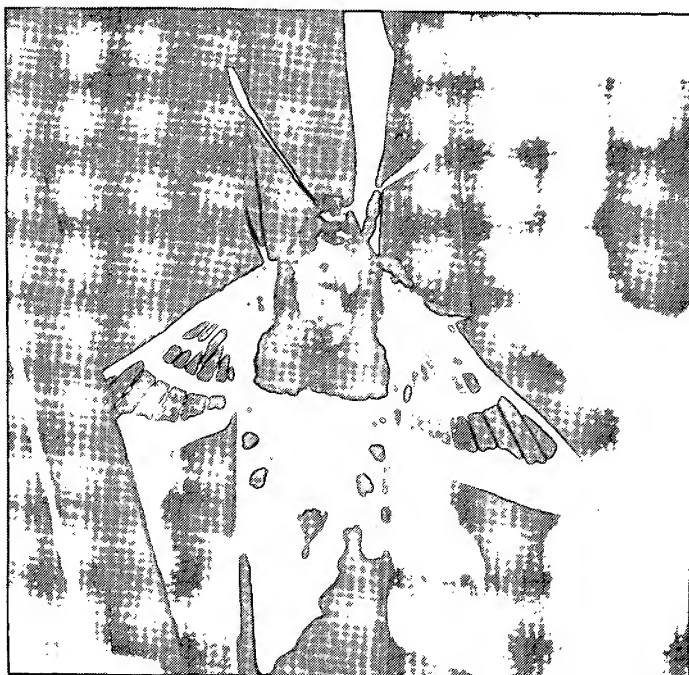

1996 DUES NOTICE

Enclosed in this Newsletter is your dues envelope for 1996. Please note the modest increase in dues, the first in many years. Your prompt attention will be most appreciated. Dues are to be sent directly to the Treasurer, Tom Rocheleau, 3100 Buena Vista St, Madison, WI 53704. To determine your status, please check the address label on this Newsletter. Appearing after your name will be the last year dues are paid for and your membership category (Individual, Family, Sustaining or Patron). Also be sure to notify us of any address changes or corrections when you send in your dues, or notify us at the address below.

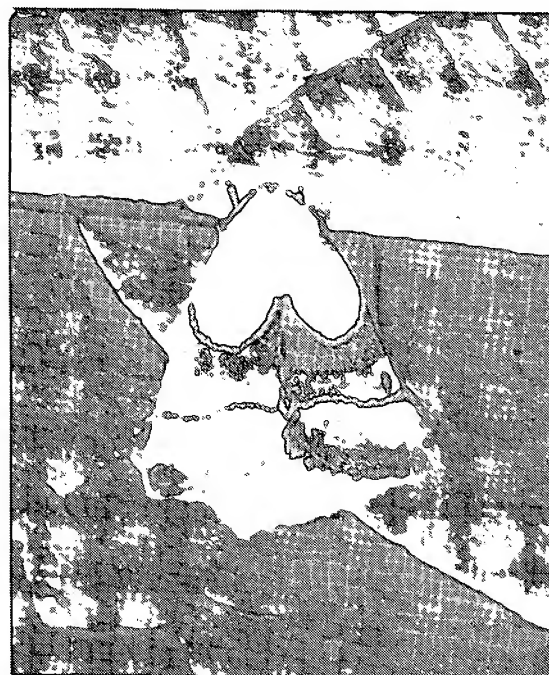

The Newsletter of the Wisconsin Entomological Society is published three times a year, at irregular intervals. It is provided to encourage and facilitate the exchange of information by the membership, and to keep the members informed of the activities of the organization. Members are strongly encouraged to contribute items for inclusion in the Newsletter. Please send all news items, notes, new or interesting insect records, season summaries, research requests, and report any address changes to the editor: Les Ferge, 7119 Hubbard Avenue, Middleton, WI 53562.

CECROPIA MOTHS - MARK EVANS

HUMMINGBIRD MOTH - ROBBYE JOHNSON

ARCIGERA FLOWER MOTH - JANICE STIEFEL

PAINTED LADY - JANICE STIEFEL

LANCE-TAILED DARNER - DAVE WESTOVER

1995 WISCONSIN LEPIDOPTERA SEASON SUMMARY

Coordinator: Les Ferge (LAF). Contributors: George J. Balogh (GJB), Tom Barina (TB), Bob Borth (BB), James A. Ebner (JAE), Dean Hansen (DH), Jim Kruse (JK), Karl and Dorothy Legler (KDL), James C. Parkinson (JCP), Tom Rocheleau (TR), Scott & Ann Swengel (SAS), Andrew H. Williams (AHW).

Twelve reports, containing in excess of 3000 specimen records in total, were contributed. Due to this massive volume of data, only records representing new distributional information, particularly of infrequently recorded species or notable immigrants, were included in the accompanying species account. Thirteen moth species previously unrecorded in Wisconsin were added to the state list, which brings the macro-moth total to 1184 species, which includes confirmed records of 707 Noctuid and 282 Geometrid species.

Spring was cool and wet, with delayed emergences of many species and persistence of early season fliers such as overwintering Noctuidae (*Lithophane* and *Eupsilia* species) and the Sphingid *Deidamia inscripta* up to a month later than usual. Hot and dry conditions began abruptly in mid-June and prevailed until mid-August, when heavy rains arrived. The well above-average temperatures accelerated insect development so that emergences of mid to late summer species had caught up to normal, with some late season moths, such as *Papaipema* species, emerging one to two weeks earlier than expected. Cold conditions and early frosts hampered collecting in most of September.

Despite the slow start to the season, a good number of southern immigrant species were recorded by late July. Among the butterflies were *Hylephila phyleus*, *Zerene cesonia*, *Eurema lisa*, *Nathalis iole*, *Strymon melinus*, *Junonia coenia* and *Euptoieta claudia*. A number of unusual southern immigrant and stray moth species were also recorded, including *Agrias cingulata*, *Ceratomia hageni*, *Eumorphia fasciata*, *Melipotis perpendicularis*, *Mocis texana*, *Amyna octo* and *Magusa orbifera*.

THE NABA-XERCES JULY 4TH BUTTERFLY COUNT, 1996

The 22nd annual NABA-Xerces July 4th Butterfly Count will be held this summer. These counts are fun-filled but also track the butterfly populations of North America. Volunteers select a count area with a 15-mile diameter and conduct a one-day census of all butterflies sighted within that circle. These counts are usually held in the few weeks before or after the 4th of July.

The North American Butterfly Association (NABA) organizes the counts and publishes annual reports. These reports provide important information about the geographic distribution and population sizes of the species counted. Comparisons of the results over the years monitor changes in butterfly populations and reveal the effects of weather and habitat change on the different species. In some years the count shows dramatic changes in butterfly populations, while other years indicate little fluctuation in numbers. Either way, butterfly counters are always curious about what next year's results will be.

No matter how much or how little butterfly watching you've done, the results of butterfly counting can be surprising and interesting. If a count already exists in your area, please join them for a day of fascinating butterfly counting. If there is no count in your area, you may start your own if you know how to identify the butterflies. Otherwise, inspire a nature center or butterfly club to start one for you!

For more information on the count program, counts in your area, how to conduct a count, and NABA, please write (a self-addressed, stamped envelope expedites response):

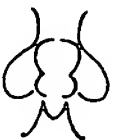

NABA, 4 Delaware Road, Morristown, NJ 07960.

To order the 1995 count report, please send your report order, specifying year of count results desired, and a check or money order payable in U. S. Dollars to NABA at the address below. The cost is \$4.00 (NABA members) or \$6.00 (non-members).

4th of July Butterfly Count, 909 Birch Street, Baraboo, WI 53913
